0.a. Goal

Goal 17. Strengthen the means of implementing and revitalizing the Global Partnership for Sustainable Development

0.b. Target

17.8 Ensure that the technology bank and the mechanism for strengthening the scientific and technological capacities and the innovation capacities of the least developed countries are fully operational by 2017 and strengthen the use of key technologies, in particular IT and communications

0.c. Indicator

17.8.1 Proportion of the population using the Internet

0.e. Metadata update

5/1/2020 12:00:00 AM

1.a. Organisation

Burundi Institute of Statistics and Economic Studies (ISTEEBU)

1.b. Contact person(s)

NDAYISENGA Modest

1.c. Contact organisation unit

Social studies and statistics and poverty monitoring (ESSSP)

1.d. Contact person function

ESSSP department manager

1.e. Contact phone

79401938

1.f. Contact mail

1157 BUJUMBURA

1.g. Contact email

ndayimode2010@gmail.com

2.a. Definition and concepts

Percentage of the population who used the Internet in the past 12 months

2.b. Unit of measure

%

3.a. Data sources

Household surveys

3.b. Data collection method

Data are collected from household surveys using the "household" questionnaire

3.c. Data collection calendar

New data is data from EICVMB 2019_2020

3.d. Data release calendar

new release will be from 2019_2020

3.e. Data providers

ISTEEBU

3.f. Data compilers

ISTEEBU is responsible for compiling this indicator at the national level

3.g. Institutional mandate

ISTEEBU is the body recognized by the Burundian government for the collection, processing and dissemination of official statistics helping in planning and decision-making.

4.a. Rationale

This indicator is relevant because it highlights the difference between the crude birth rate and the crude death rate. It measures the increase of a population over a period of time due only to births and deaths

4.b. Comment and limitations

Updating the indicator requires a household survey which is very resource intensive. The indicator cannot be calculated by gender.

4.c. Method of computation

Proportion of the population at risk of criminal violence in the past 12 months

4.d. Validation

The results of the survey are validated at two levels: technical validation and official validation before publication

5. Data availability and disaggregation

The indicator is available at national level, province, area of residence (Total; Women; Men; Urban area; Rural area)

6. Comparability/deviation from international standards

The indicator can be compared to other indicators of the same type at regional and international level

7. References and Documentation

Household Surveys Report
