Data are collected from household surveys using the "household" questionnaire

## ***3.c. Data collection calendar***

The probable date of the next collection will be 2020

## ***3.d. Data release calendar***

In 2021

## ***3.e. Data providers***

ISTEEBU

## ***3.f. Data compilers***

ISTEEBU is responsible for compiling this indicator at the national level

## ***3.g. Institutional mandate***

ISTEEBU is the body recognized by the Burundian government for the collection, processing and dissemination of official statistics helping in planning and decision-making.

## ***4.a. Rationale***

The indicator is relevant because it reflects the situation on the living conditions of the population.

## ***4.b. Comment and limitations***

Updating the indicator requires a household survey that is very resource-intensive and almost all of the funding comes from partners.

#### ***4.c. Method of computation***

Ratio of people aged 18 and over who used the internet in the last 12 months preceding the survey on the size of the population aged 18 and over multiplied by 100

#### ***4.d. Validation***

The results of the survey are validated at two levels: technical validation and official validation before publication

#### ***5. Data availability and disaggregation***

The indicator is available at national level, province, area of residence (Total; Women; Men; Urban area; Rural area)

#### ***6. Comparability/deviation from international standards***

The indicator can be compared to other indicators of the same type at regional and international level

#### ***7. References and Documentation***

Report of the Survey on Household Living Conditions in Burundi
