

0.a. Goal

Goal 16. Promote the emergence of peaceful and inclusive societies for sustainable development, ensure access to justice for all and build, at all levels, effective, accountable and inclusive institutions

0.b. Target

16.6 Build effective, accountable and transparent institutions at all levels

0.c. Indicator

16.6.1. Level of confidence of the population in the main state institutions (Parliament, Government, Justice)

0.e. Metadata update

5/1/2020 12:00:00 AM

1.a. Organisation

NDAYISENGA Modest

1.b. Contact person(s)

Social studies and statistics and poverty monitoring (ESSSP)

1.c. Contact organisation unit

ESSSP department manager

1.d. Contact person function

79401938

1.e. Contact phone

1157 BUJUMBURA

1.f. Contact mail

ndayimode2010@gmail.com

2.a. Definition and concepts

This is the percentage of the population whose last experience with public services was satisfactory

2.b. Unit of measure

%

3.a. Data sources

Household surveys

3.b. Data collection method

Data are collected from household surveys using the "household" questionnaire

3.c. Data collection calendar

The probable date of the next collection will be 2021

3.d. Data release calendar

2022

3.e. Data providers

ISTEEBU

3.f. Data compilers

ISTEEBU is responsible for compiling this indicator at the national level

3.g. Institutional mandate

ISTEEBU is the body recognized by the Burundian government for the collection, processing and dissemination of official statistics helping in planning and decision-making.

4.a. Rationale

This indicator is relevant because it highlights the difference between the crude birth rate and the crude death rate. It measures the increase of a population over a period of time due only to births and deaths

4.b. Comment and limitations

Updating the indicator requires a household survey which is very resource intensive. The indicator cannot be calculated by gender.

4.c. Method of computation

Ratio of the population whose last experience with public services was satisfactory to the total population, expressed as a percentage

4.d. Validation

The results of the survey are validated at two levels: technical validation and official validation before publication

5. Data availability and disaggregation

Available nationally

6. Comparability/deviation from international standards

The indicator can be compared to other indicators of the same type at regional and international level
