### 0.a. Goal

Goal 3. Ensure healthy lives and promote well-being for all at all ages

### 0.b. Target

3.1 By 2030, reduce the global maternal mortality rate to below 70 per 100,000 live births

### 0.c. Indicator

3.1.2. Percentage of births attended by trained health personnel

## 0.e. Metadata update

2020

## 1.a. Organisation

**ISTEEBU** 

### 1.b. Contact person(s)

NDAYISENGA Modest

# 1.c. Contact organisation unit

Department of Social Studies and Statistics and Poverty Monitoring, Ponit focal ODD

### 1.d. Contact person function

Head of Service and Focal Point

# 1.e. Contact phone

79401937

# 1.g. Contact email

ndayimode2010@gmail.com

# 2.a. Definition and concepts

it is the number of deliveries attended by qualified health personnel (doctor, midwife, nurse) and the total number of pregnancies expected during the last 12 months

### 2.b. Unit of measure

%

### 3.a. Data sources

EDSB-III, 2016-2017

### 3.b. Data collection method

Data are collected from household surveys using the "household" questionnaire

#### 3.c. Data collection calendar

The probable date of the next collection will be 2021 (Next DHS)

#### 3.d. Data release calendar

In 2022

### 3.e. Data providers

**ISTEEBU** 

### 3.f. Data compilers

ISTEEBU is responsible for compiling this indicator at the national level

### 3.g. Institutional mandate

ISTEEBU is the body recognized by the Burundian government for the collection, processing and dissemination of official statistics helping in planning and decision-making.

#### 4.a. Rationale

The indicator is relevant because it reflects the demographic and health situation of the population.

### 4.b. Comment and limitations

Updating the indicator requires a household survey which is very resource intensive.

Page: 2 of 3

# 4.c. Method of computation

Ratio between the number of deliveries conducted by a person with at least the qualification of auxiliary birth attendant and the total number of deliveries multiplied by 100.

### 4.d. Validation

The results of the survey are validated at two levels: technical validation and official validation before publication

# 5. Data availability and disaggregation

The indicator is available at national level, province, area of residence (Total; Urban area; Rural area)

# 6. Comparability/deviation from international standards

The indicator can be compared to other indicators of the same type at regional and international level
