#### 0.a. Goal

Objective 12. Establish sustainable consumption and production patterns

### 0.b. Target

12.2 By 2030, achieve sustainable management and rational use of natural resources

#### 0.c. Indicator

12.2.1. Population growth rate

### 0.e. Metadata update

5/1/2020 12:00:00 AM

## 1.a. Organisation

Burundi Institute of Statistics and Economic Studies (ISTEEBU)

### 1.b. Contact person(s)

NDAYISENGA Modest

## 1.c. Contact organisation unit

Social studies and statistics and poverty monitoring (ESSSP)

## 1.d. Contact person function

ESSSP department manager

### 1.e. Contact phone

(+257) 79401937

### 1.f. Contact mail

1156 BUJUMBURA

### 1.g. Contact email

ndayimode2010@gmail.com

### 2.a. Definition and concepts

Difference between crude birth rate and crude death rate. It measures the increase of a population over a period of time due only to births and deaths

## 2.b. Unit of measure

Percentage

#### 3.a. Data sources

census or population projections

#### 3.b. Data collection method

Demographic projections

#### 3.c. Data collection calendar

The probable date of the next collection will be 2021 (Next DHS)

### 3.d. Data release calendar

In 2022

### 3.e. Data providers

**ISTEEBU** 

### 3.f. Data compilers

ISTEEBU is responsible for compiling this indicator at the national level

### 3.g. Institutional mandate

ISTEEBU is the body recognized by the Burundian government for the collection, processing and dissemination of official statistics helping in planning and decision-making.

#### 4.a. Rationale

This indicator is relevant because it highlights the difference between the crude birth rate and the crude death rate. It measures the increase of a population over a period of time due only to births and

deaths

### 4.b. Comment and limitations

Updating the indicator requires a household survey which is very resource intensive. The indicator cannot be calculated by gender.

# 4.c. Method of computation

It is the difference between the crude birth rate and the crude death rate. It measures the increase of a population over a period of time due only to births and deaths

#### 4.d. Validation

The results of the survey are validated at two levels: technical validation and official validation before publication

### 5. Data availability and disaggregation

The indicator is available at national level

### 6. Comparability/deviation from international standards

The indicator can be compared to other indicators of the same type at regional and international level

### 7. References and Documentation

ISTEEBU, Demographic projections report
