### 4.a. Rationale

The indicator is relevant because it reflects the educational situation in Burundi.

### 4.b. Comment and limitations

Updating the indicator requires a survey of schools in the territory of Burundi. The reluctance is noted for private establishments.

## 4.c. Method of computation

Ratio between all new admissions in the last year of an education cycle (primary or secondary) and the population at the age at which this level is reached.

### 4.d. Validation

The results of the survey are validated at two levels: internal validation and validation at the CTIS level before publication

## 5. Data availability and disaggregation

The indicator is available at the national level, by cycle and by sex. ([Primary: Total, Girls, Boys]; [Lower secondary: Total, Girls, Boys]; [Upper secondary: Total, Girls, Boys])

## 6. Comparability/deviation from international standards

The indicator can be compared to other indicators of the same type at regional and international level
