4.a. Rationale

The indicator is relevant because it reflects the educational situation in Burundi.

4.b. Comment and limitations

Updating the indicator requires a survey of schools in the territory of Burundi. The reluctance is noted for private establishments.

4.c. Method of computation

Ratio between the number of students enrolled in a given cycle regardless of their age, and the population of official schooling age (7-15 years for basic, 16-19 for post-basic)

4.d. Validation

The results of the survey are validated at two levels: internal validation and validation at the CTIS level before publication

5. Data availability and disaggregation

The indicator is available at national level and by sex. ([First cycle: Total, Women, Men]; [Cycle 4: Total, Women, Men]; [General and educational post-basic: National, Women, Men])

6. Comparability/deviation from international standards

The indicator can be compared to other indicators of the same type at regional and international level
